#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### DETAILED ACTION

The amendment filed August 26, 2004, has been received and entered. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior office action.

Claims 1-12 and 18-29 are pending and are examined on the merits.

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 12 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, it is not clear where support for the new language "wherein the ratio of the dry weight of the xylose to that of the galactose is about 20:1" is derived in the

Art Unit: 1651

specification as originally filed. This is a new matter rejection.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 and 18-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. 6,287,609.

Although the conflicting claims are not identical, they are not patentably distinct from each other because, while the patented claims have a narrower scope than the claims under examination, the claims under examination clearly contain subject matter which is overlapping or anticipated by the patented claims. Thus, despite the differences in scope of the two sets of

Art Unit: 1651

claims, the patented claims, if they were prior art, would anticipate or render the claims under examination obvious. A terminal disclaimer is clearly required in such a situation.

All of applicant's argument regarding this ground of rejection has been fully considered but is not persuasive of error. With respect to claim 1 as currently amended, the limitation requiring a xylose:arabinose ratio ranging from 2.5:1 to 4.5:1 is clearly anticipated by claim 1 of the '609 patent, which includes an explicitly recited xylose:arabinose ratio of 3:1. Thus, contrary to applicant's argument, the claims under examination, even as amended, continue to recite embodiments which are anticipated by the patented claims. Moreover, even if one were to consider the recitation in patented claim 1 "at least about 3:1" as being non-anticipatory of the present upper limit of 4.5:1, the patented claim clearly suggests such a value, given the absolute percentages of xylose and arabinose recited in the patented claims.

With respect to claim 12 as amended, note that patented claims recite a product-by-the-process (patented claim 12) which is an acidified psyllium fraction which is the same product as recited in claim 12 under examination herein. In view of the fact that the galactose-enriched product recited in claim 12 is

Art Unit: 1651

the same product as recited in the patented product-by-process claims, contrary to applicant's argument, the prior art product necessarily contains the same ingredients, absent clear and convincing evidence to the contrary. Because the claims under examination recited subject matter which is either anticipated or suggested by the patented claims, a terminal disclaimer is clearly required.

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated

Art Unit: 1651

from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
